### DETAILED ACTION

This action is in response to the application election of process claims 1-11, 19-21, filed on 8/4/03.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-11, 19,21 are rejected under 35 U.S.C. 102(e) as being anticipated by Jung et al (US 2002/0018912).

Jung et al teaches growing organic layer on ITO electrode layer by irradiation of UV light generated by mercury lamp, wherein UV irradiation is performed during the deposition of organic layer. Jung et al further discloses providing first evaporation source for first organic layer and second evaporation source for second organic layer, wherein first and second organic sources and UV light, having wavelength in the range of 100-200 nm, comes from the same direction. (See abstract and fig.1, fig 2 and related description).

### ***Allowable Subject Matter***

Claims 20 are allowed. The following is an examiner's statement of reasons for allowance: Prior art neither teach nor suggest the claimed method of depositing organic layers, while the UV light is being irradiated in a multiple chamber deposition apparatus.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Prior art teaches organic layer deposition with light.
